

Implementation Requirements

Version 3.0
Last updated: July 2024

KaiOS
enable tomorrow

1. Hello!

Welcome to our Implementation Requirements.

In this document, you'll learn the requirements and guidelines for packaging and placing boot screens and apps on KaiOS devices. You'll also find template files and designs.

By respecting these guidelines, you help us protect our brand identity and fulfill the agreements we have with all partners that are part of the Kai ecosystem.

Thank you for your cooperation.

2. Our brand on a page

Our brand idea

Unleash unexpected potential.

The internal guiding principle that informs everything we do.

Our tagline

Enable Tomorrow

This is what KaiOS is about.

We **enable** others, and we do this so that we can build a better **tomorrow**, together.

Our brand purpose

We exist to empower people around the world through technology.

This is why we get out of bed every morning.

Our brand positioning

Re-imagine what's possible by enabling personal, business, and social transformations.

KaiOS is an enabler; we empower others to transform themselves and achieve more than they expected possible.

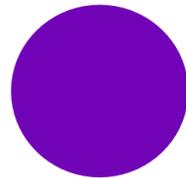

Logo

1. Brand logo
2. Logo lockup
3. What to do
4. What not to do
5. Enabled by KaiOS badge

1. Brand logo

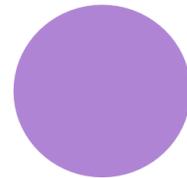

The brand logo is designed to give prominence to the KaiOS brand. It features a sharp central design element that expresses our commitment to advanced technologies and a determination to take on challenges.

Kai Purple (267C) 100%
RGB: 111 2 181
CMYK: 75 100 0 0
Hex: #6f02b5

Kai Purple (267C) 50%
RGB: 111 2 181
CMYK: 75 100 0 0
Hex: #6f02b5

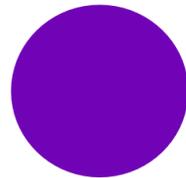

Light Purple (528C)
RGB: 175 132 212
CMYK: 33 47 0 0
Hex: #af8ed8

2. Logo lockup

The logo lockup is the term used when the logo is used together with the tagline. It expresses the main idea that KaiOS stands for.

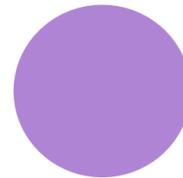

Aside from exceptional situations, the logo lockup should be used **as the first choice logo**.

Kai Purple (267C) 100%
RGB: 111 2 181
CMYK: 75 100 0 0
Hex: #6f02b5

Kai Purple (267C) 50%
RGB: 111 2 181
CMYK: 75 100 0 0
Hex: #6f02b5

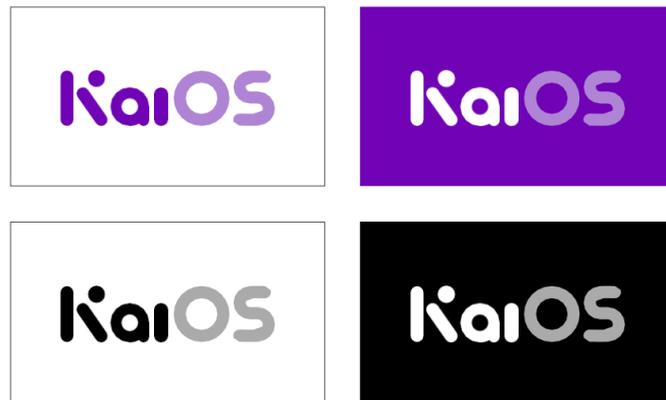

Light Purple (528C)
RGB: 175 132 212
CMYK: 33 47 0 0
Hex: #af8ed8

3. What to do

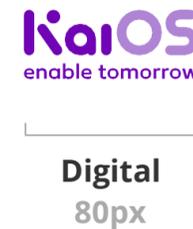

Use white on purple, or purple on white.

If necessary, you can also use the logo in black or white.

Make it readable.

Use a minimum size of **80px for digital** and **20mm for print**. Isolate the logo from competing visual elements by adding clear space.

Use the tagline.

Whenever possible, use the logo and the tagline together (see [Logo lockup](#)).

4. What not to do

Please, be mindful of our logo. Respect the guidelines and avoid mis-usage.

Don't use the logo in any colors other than purple, black, and white.

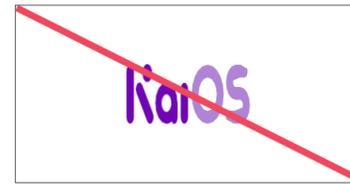

Don't use two colors on the logo.

Don't change the logo or logo lockup placement.

Don't rotate the logo or logo lockup.

Don't resize the logo or logo lockup without keeping the original proportions.

Don't use a background image with elements that interfere with the logo or logo lockup design.

Don't use a background color with low contrast with the logo or logo lockup.

Don't force the logo or logo lockup into a complicated shape.

Don't apply special effects, such as drop shadow, to the logo or logo lockup.

Don't place an image into the logo or logo lockup.

Don't use the logo lockup with any colors other than purple, black, and white..

Don't change the sizing ratio of the logo or tagline.

Don't invert the order of the tagline and the logo.

Don't move the horizontal tagline from the logo.

Don't use two lines for the tagline.

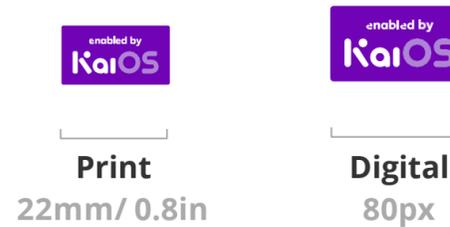

5. *Enabled by KaiOS* badge

The *Enabled by KaiOS* badge follows the same rules as the KaiOS logo and other emblems.

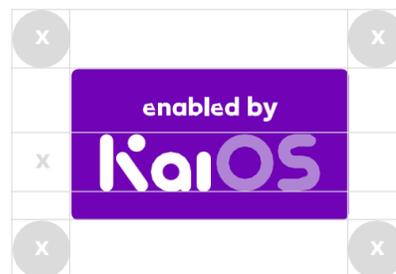

Colors

Minimum size

Clear space

Incorrect usages

Don't change badge color.

Don't remove or rearrange badge elements.

Don't apply it illegibly.

UX

1. Carousel apps placement

2. 512MB/4GB device

- a. Apps placement (carrier products)
- b. Apps placement (open market products)
- c. Apps placement (landscape products)
- d. Grouped Kai game/utility apps
- e. Preload applications

3. 256MB/512MB device

- a. Apps placement (carrier products)
- b. Apps placement (open market products)
- c. Apps placement (landscape products)

4. Browser setup & bookmarks

5. Physical keys

- a. D-pad, LSK, and RSK navigation on home screen

6. Startup screen

- a. Placement for one partner logo
- b. Placement for two partner logos
- c. Placement for three partner logos

7. Shutdown screen

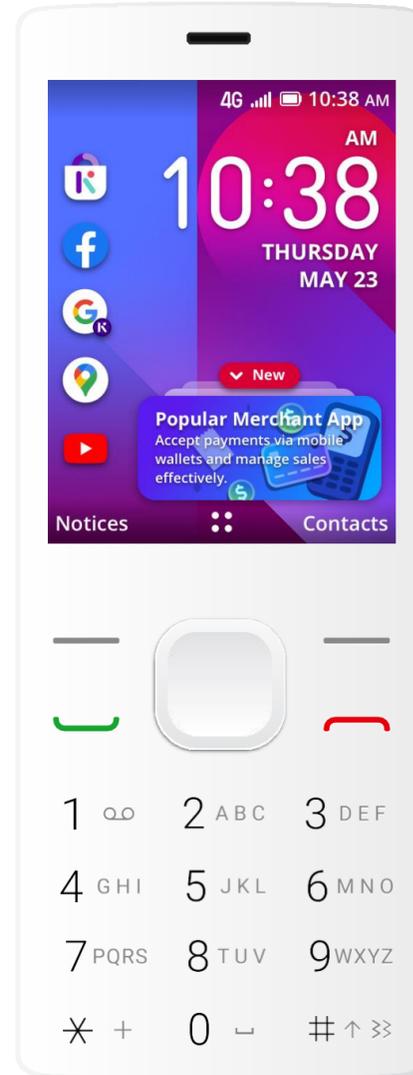

- a. KaiOS version
- b. Partner's custom version

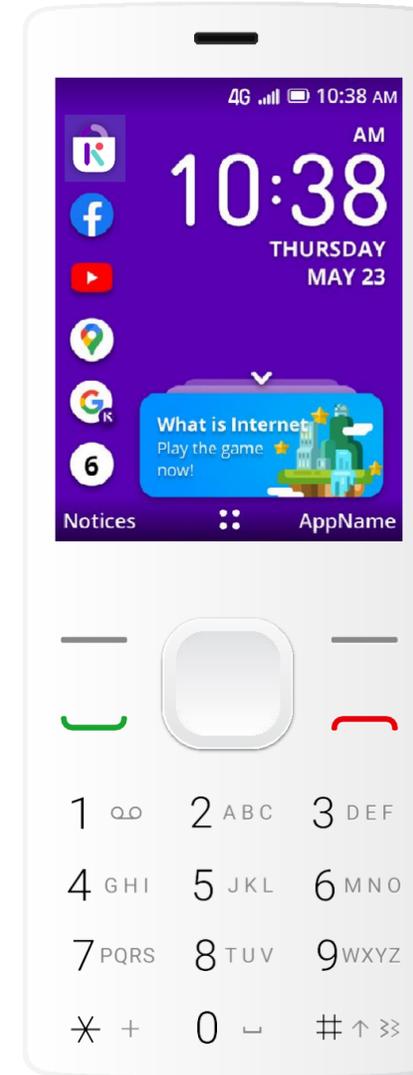

1. Carousel apps placement

Requirements

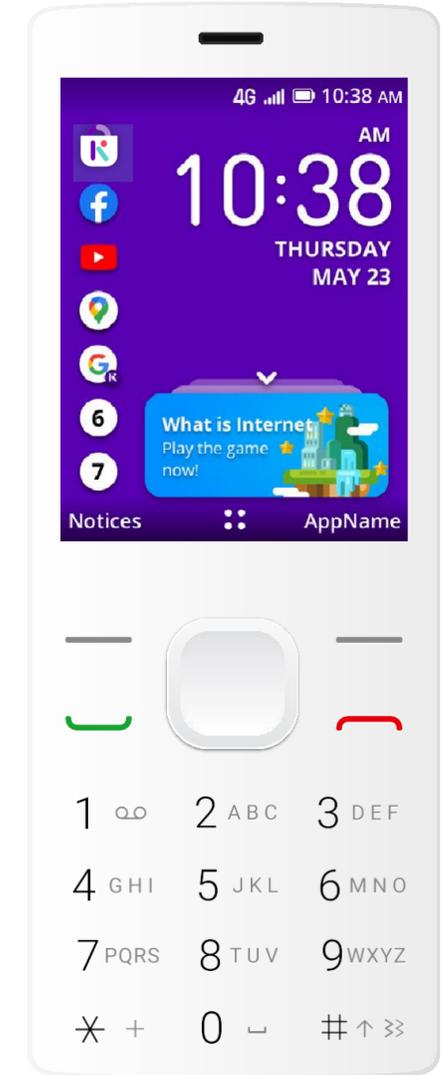

- The five default apps are KaiStore, Facebook, YouTube, Google Maps and Google Search. If they are preloaded, they shall be in carousel.
- Five apps option by default.
- KaiOS may, at its own discretion, preload one to two additional apps.
- Partners may propose to preload one to two additional apps in the carousel with a preload fee.

Carousel with 5 apps (default)

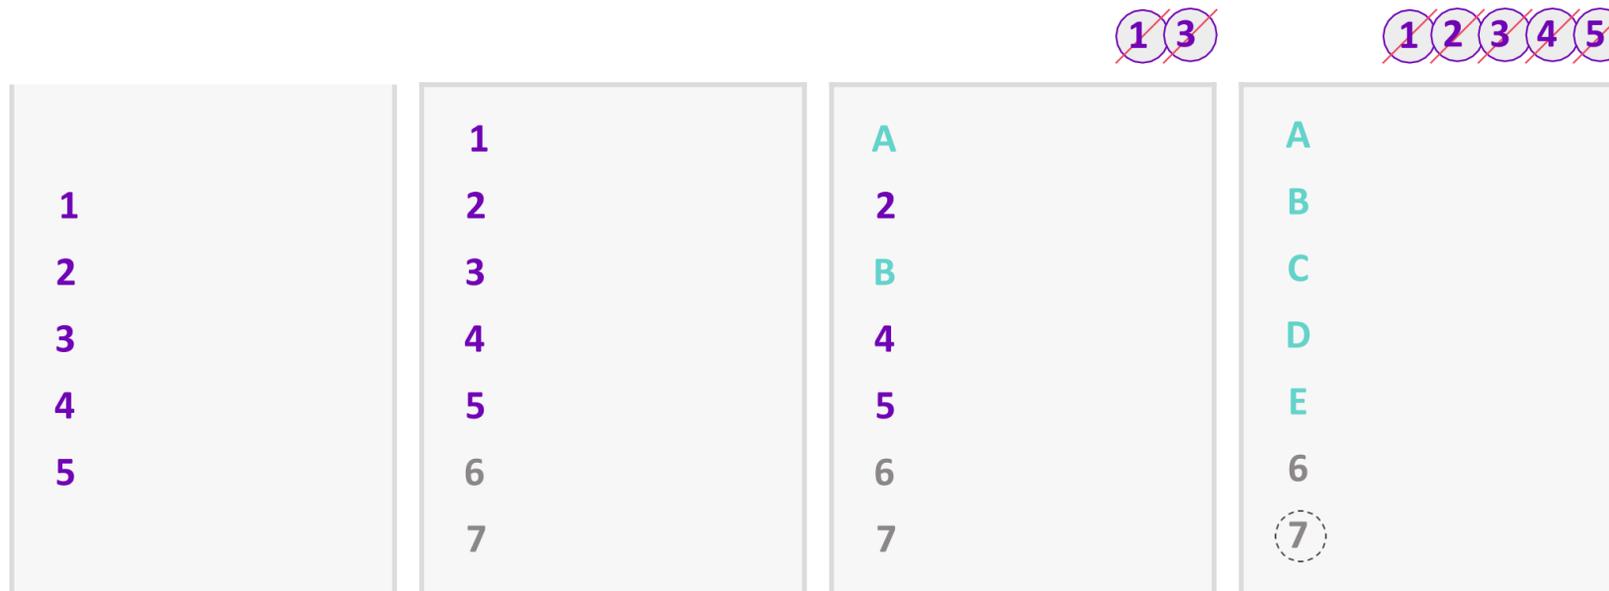

Carousel with 6 apps

Carousel with 7 apps (maximum)

1. Carousel replacement logic¹

Five apps option by default.

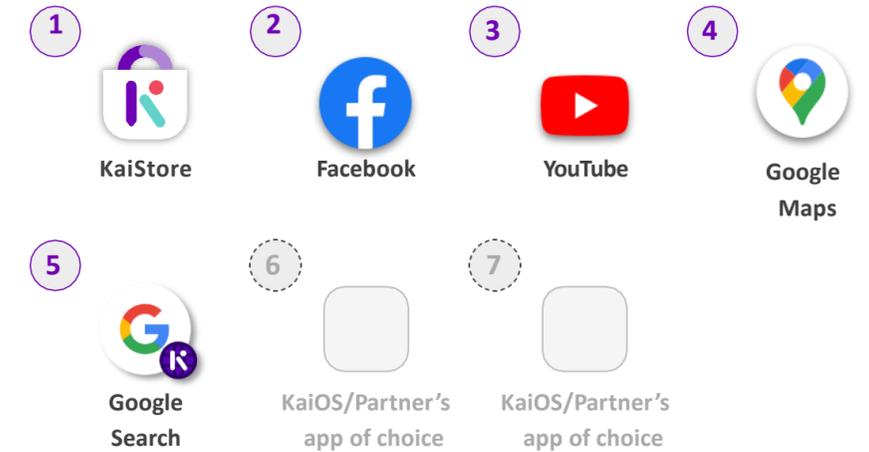

KaiOS may, at its own discretion, preload one to two additional apps.

Partners may propose to preload one to two additional apps in the carousel with a preload fee.

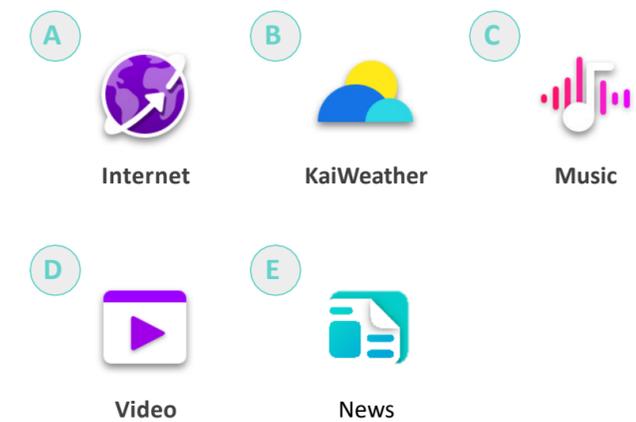

If the partner chooses not to preload *any* of the *five* default apps, the partner is required to fill up the exact spots of the missing default apps with the replacement apps in the above order.

If the partner chooses not to preload *all five* default apps, the partner is required to fill up the carousel based on the Replacement List (right).

Default Apps List

Replacement Apps List²

¹For all the rules, KaiOS reserves the right to final placement and interpretation for the content.

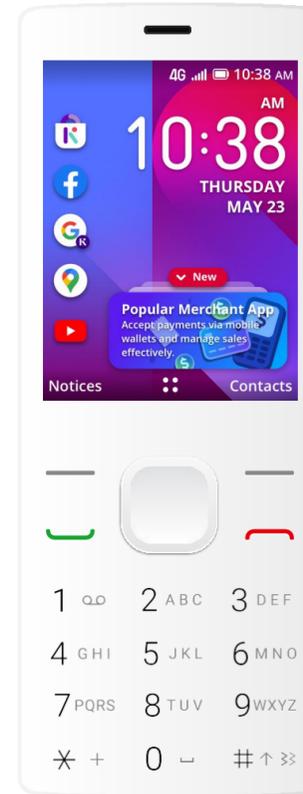

²Replacement list is provisional, and KaiOS reserves the right to final replacement rule.

512MB/4GB device

2a. Apps placement (carrier products)

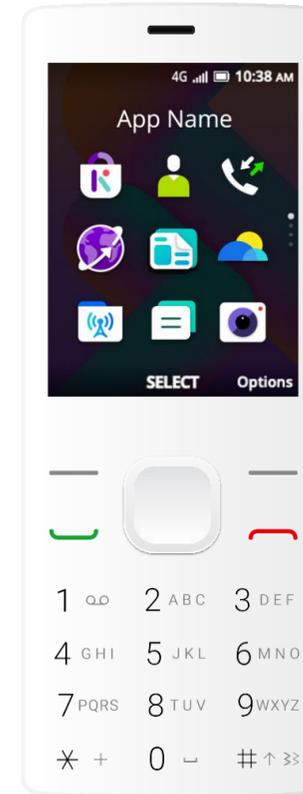

Requirements¹

- All the apps in the apps menu shown in this page shall be preloaded (except Kai Voice Assistant²).
- All apps in the carousel will also be in the apps menu.
- Underlined apps have a fixed position. Partners are not allowed to move their positions.
- Partners' apps will be placed at the bottom of apps menu.
- All apps cannot be uninstalled (except Facebook).
- If any of the apps is unavailable, all the non-underlined apps behind it should move ahead one spot altogether.
- KaiOS is not liable if a preloaded third-party app ceases to be supported by the developer or if it does not work properly.

2e. Preload applications

The following list of Preload Applications may be changed by KaiOS upon written notice to partners (email to suffice), except when adding a Preload Application that requires separate terms and conditions for use. In this case, partner's prior written consent is required.

Subject to applicable requirements detailed herein, the Parties shall document in writing the final placement of all the Preload Applications for each Device no later than when the overall technical implementation of KaiOS Platform and the Device is finalized, so called the "Technical Approval".

Preload Kai Native Applications

KaiOS may, at its own discretion, select the Preload Kai Native Applications from the below list to be pre-loaded:

- Browser
- Calculator
- Calendar
- Camera
- Clock
- Contacts
- FM Radio
- Gallery
- Launcher
- Messaging
- Music
- Phone/Dialer

³Only available on KaiOS 2.5.

⁴Only available on KaiOS 2.5.4, 3.0+, and 4.0. Subject to fee.

512MB/4GB device

2e. Preload applications (cont'd)

Preload 3rd Party Application: Horoscope

The Horoscope application means one of the following applications, at Kai own discretion, and shall be pre-loaded to be placed in the Apps Menu:

- Either AirFind application; or
- Oussa application; or
- Preload Kai Native Application

Preload 3rd Party Application: Facebook

Subject to the terms of Exhibit I.2, Facebook Applications means the following applications and shall be pre-loaded:

- Facebook Application for KaiOS

(Optional) Preload 3rd Party Application: Google

Subject to the terms of Exhibit I.1, Google Applications means the following applications and partner can decide to preload or not:

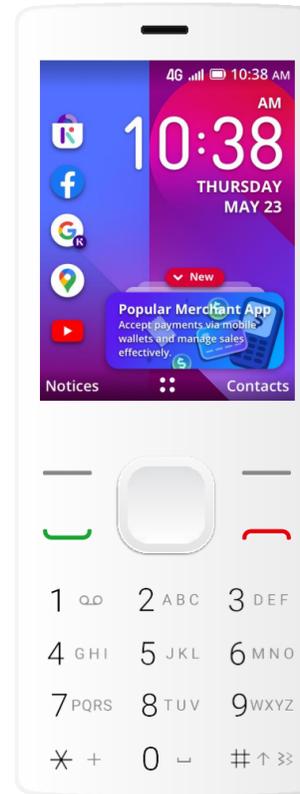

- Google Search Application, and
- Google Maps, and
- YouTube Application, and
- One other Google application that Kai may notify partner about during the Term

Package design

1. Rules of product packaging
2. Packaging templates
3. Screen cling

1. Rules of product packaging

In order to gain approval from KaiOS, you must follow these rules:

- 1**

Enabled by KaiOS badge
Display the Enabled by KaiOS badge on one or more outer sides of the packaging.
- 2**

KaiStore Apps Strip
Display the KaiStore App Strip on one or more outer sides of the packaging. Text may be localised.
- 3**

KaiOS Home Screen
Show the KaiOS home screen with the column of app icons on your device's screen. Wallpaper may be customized.
- 4**

Screen Cling
Include a screen cling adhered onto your device. The screen cling serves as an important touchpoint when your device is displayed in retail stores.

These graphics assets are available to download at kaiotech.com/partner-resources

Submit your final packaging designs to marketing@kaiotech.com for approval by KaiOS.

Note: Reserve two weeks for this approval process in your planning.

2. Packaging templates

For reference only

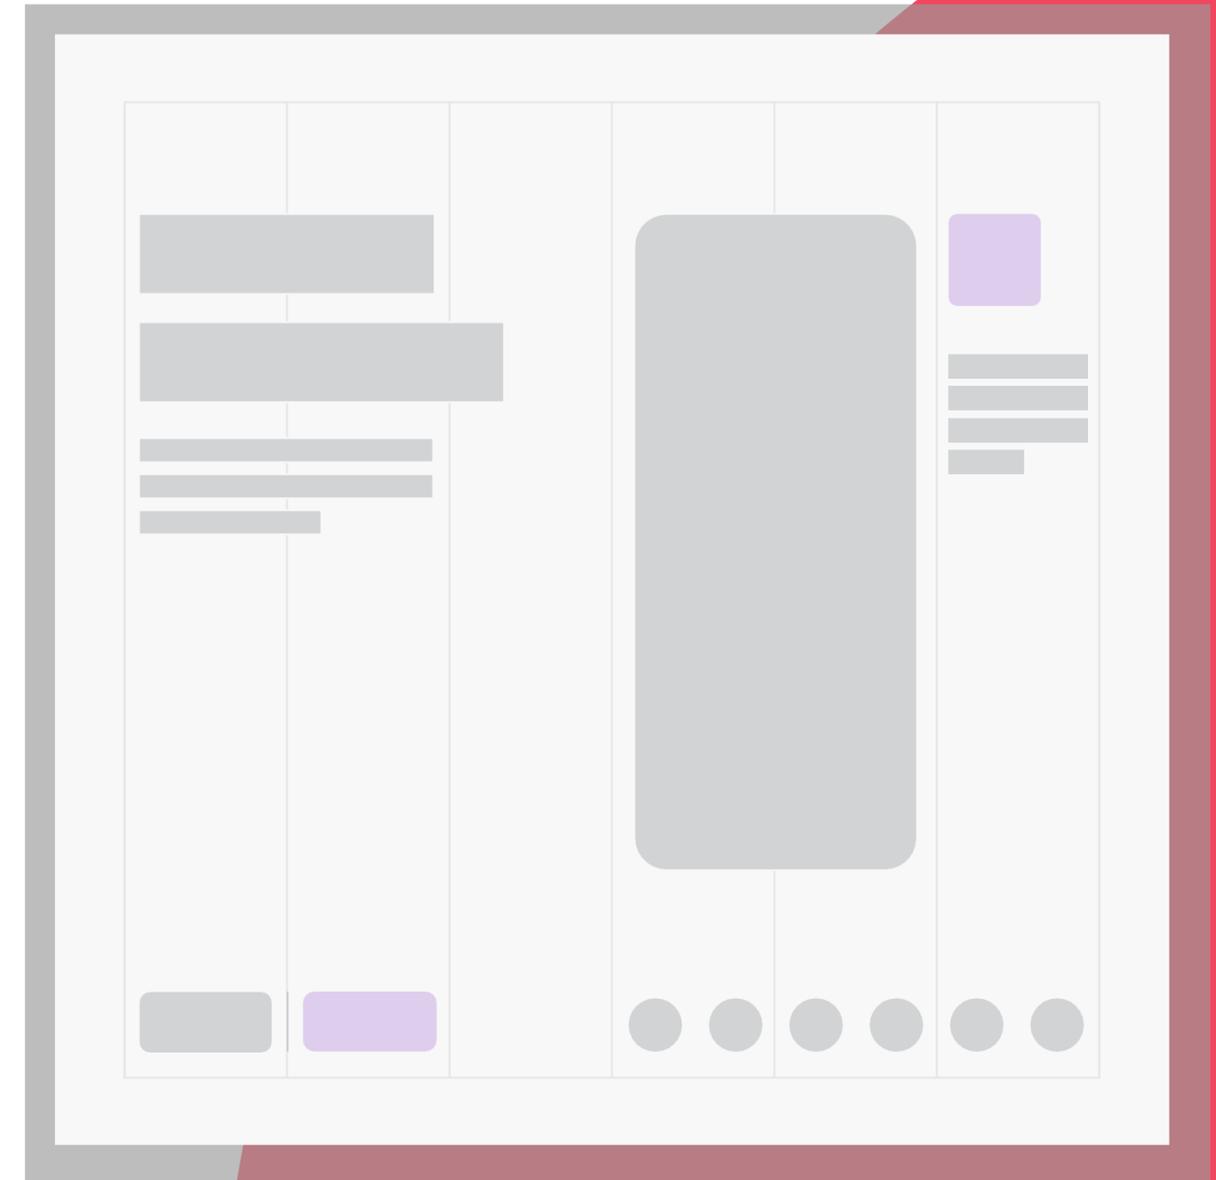

Over the next pages, we'll give you visual examples you can use as references for your packaging.

Please note that they are references — just that. **Copying them exactly as they are will not produce good results.**

We encourage you to adapt these templates, making changes as needed, including changes to the:

- positioning of the required elements
- positioning of the icons
- positioning of the text
- size of elements
- fonts in “These and many other apps available on KaiOS”

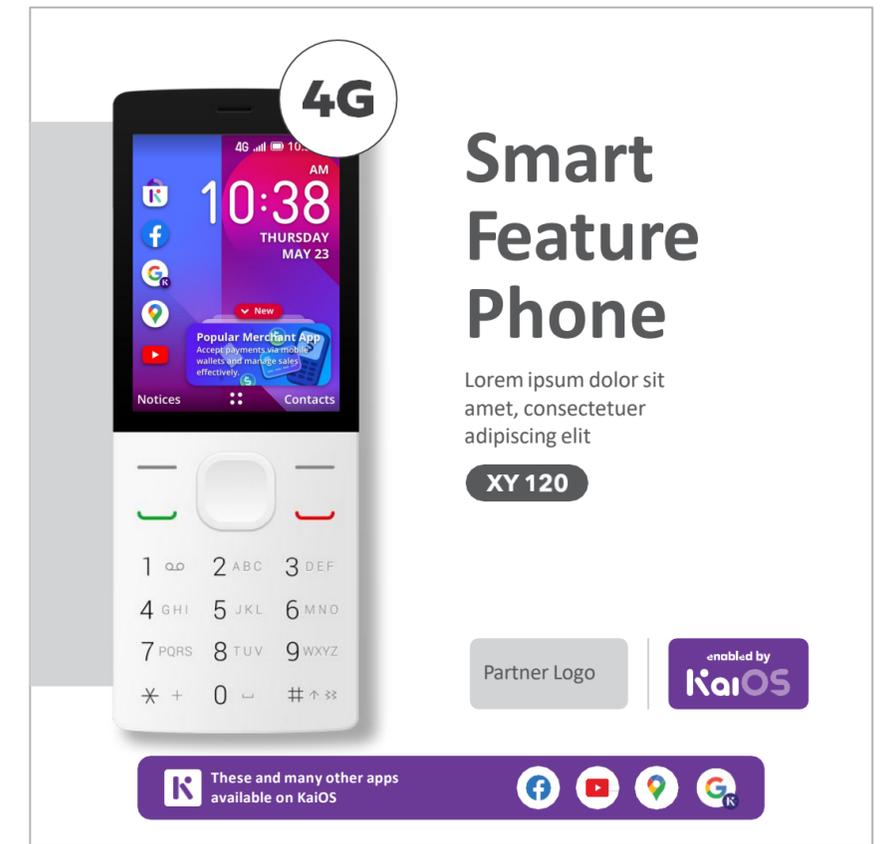

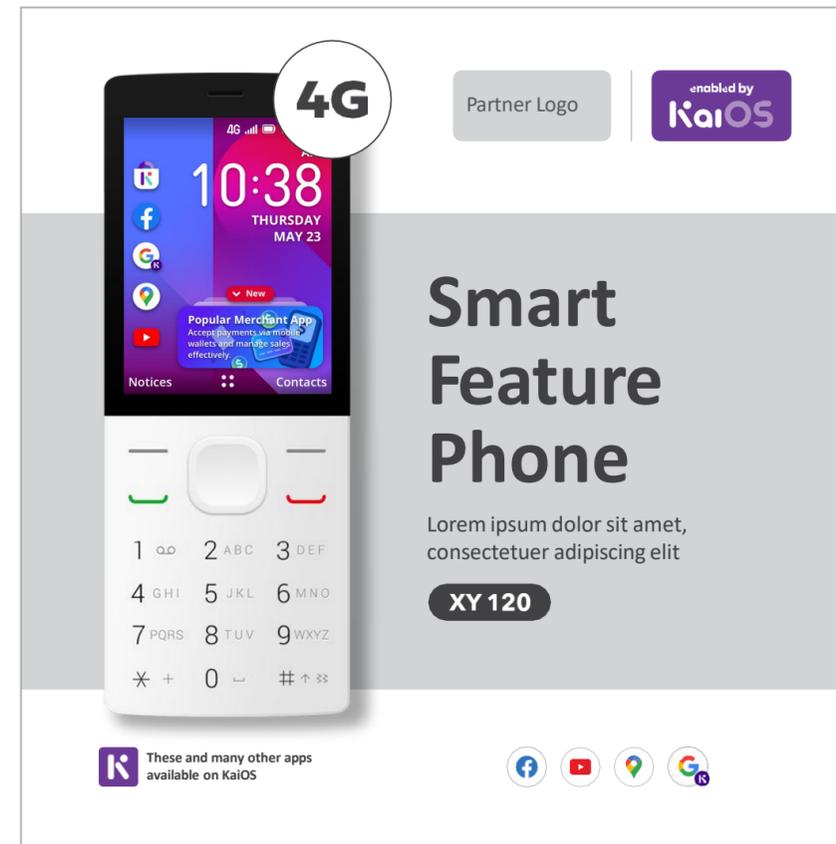

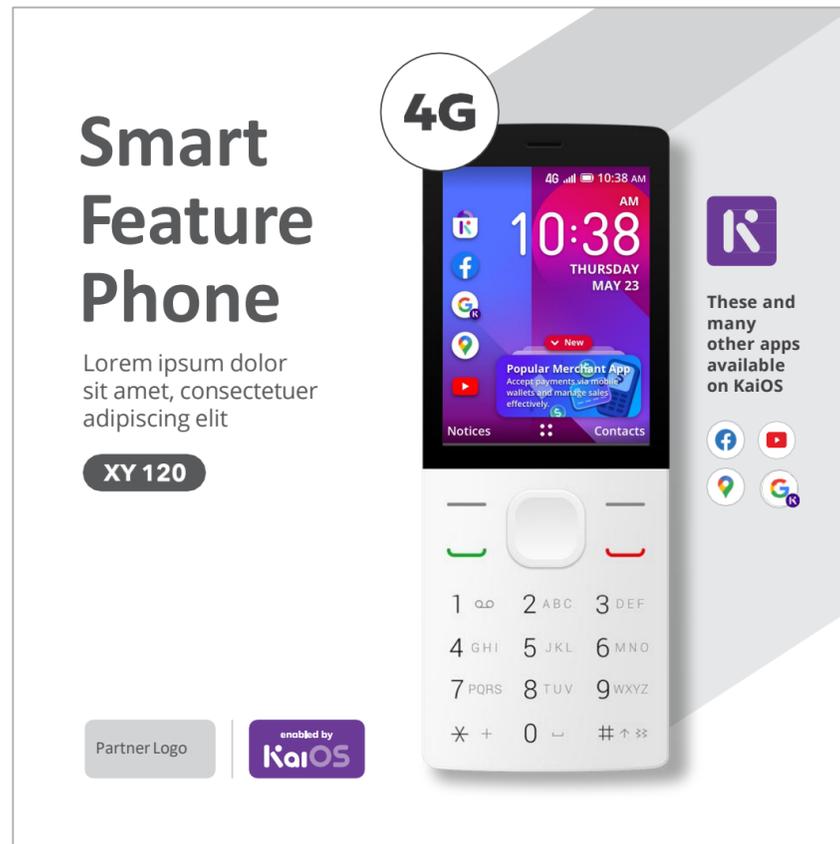

Feel free to create original designs, too. All we ask is that you respect our [Rules of product packaging on page 38](#).

For reference only

2. Packaging templates

Examples of usage on the **front side** of the product packaging

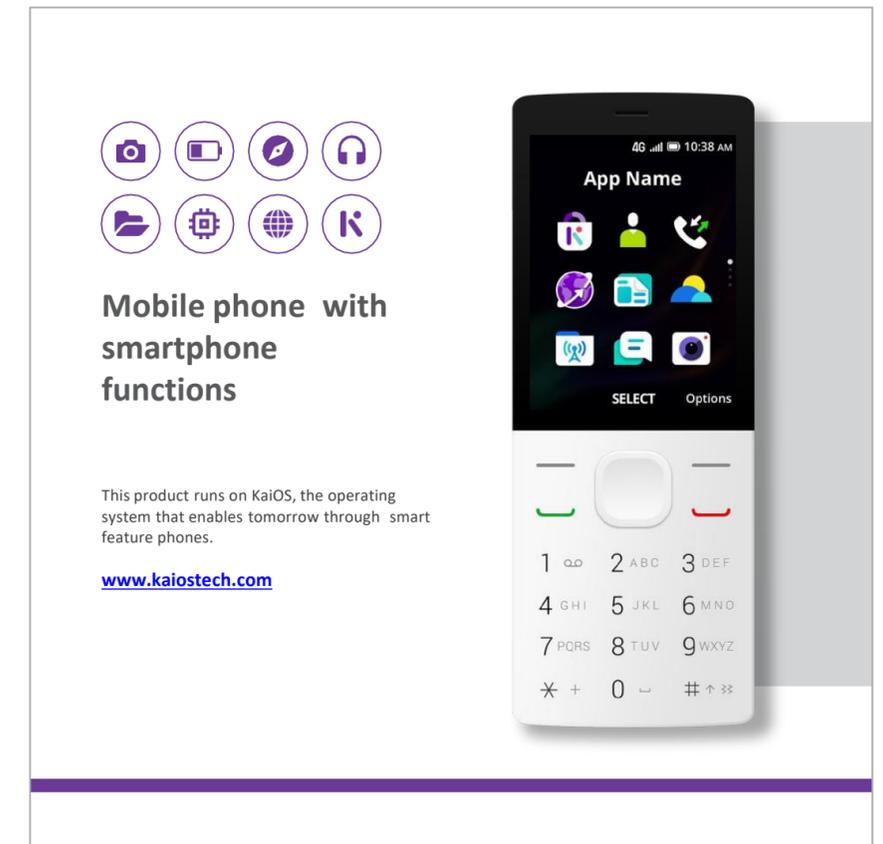

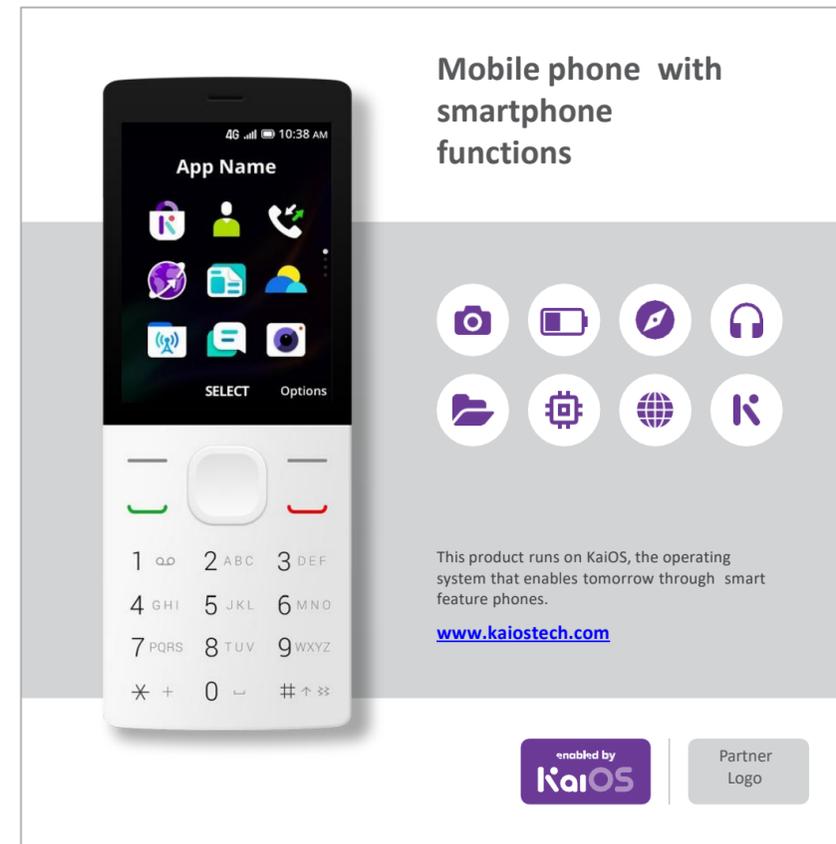

These templates are available to download at kaiotech.com/partner-resources

For reference only

2. Packaging templates

Examples of usage on the **back side** of the product packaging

These templates are available to download at kaiotech.com/partner-resources

3. Screen cling

What to display on your screen cling

We recommend you add at least two of these points onto your screen cling artwork to ensure customers can quickly understand the unique offerings of your device.

Customization

Feel free to customize the graphic templates to your needs*. For example;

- Change the screen cling’s background colour to your brand’s primary colour
- localize text to your market’s primary language
- Adapt the *Hardware Features* graphics according to your device, e.g. specify how many days your battery lasts.

*Do not customize the graphics specific to KaiOS Technologies, Facebook, YouTube, or Google Maps without first gaining approval from the respective companies.

Essential selling points

Essential apps

Facebook, YouTube, and Google Maps are highly desirable apps. Displaying these app logos will immediately set your product apart from feature phones that do not have all the same apps.

Hardware features

In addition to internet and apps, KaiOS devices also provide customers with these essential hardware features:

- Wi-Fi for internet
- Long battery life
- FM radio
- Bluetooth

Other selling points

KaiOS logo

Help customers identify a KaiOS smart feature phone by displaying our logo.

KaiStore logo & description

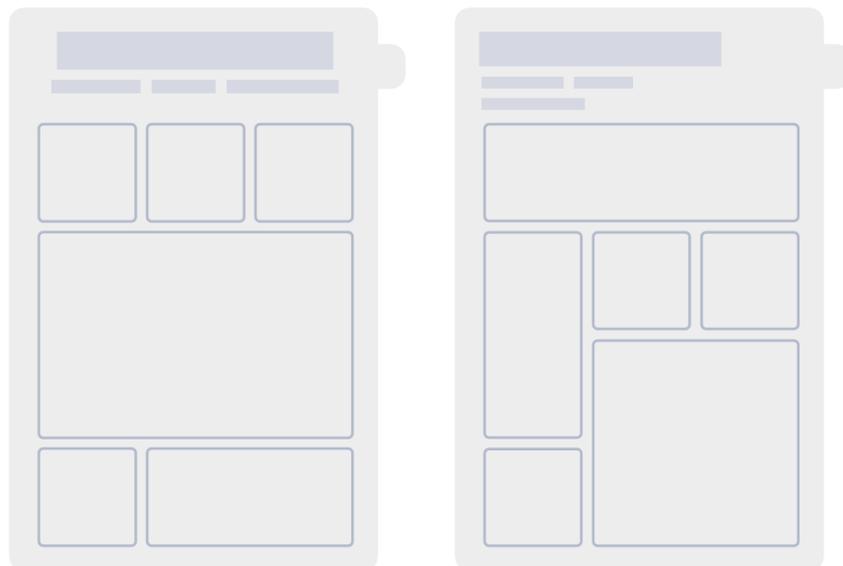

Remind customers they can download hundreds of apps from the KaiStore, many of which are free of charge.

These templates are available to download at kaiotech.com/partner-resources

3. Screen cling

To help you quickly build the screen cling for your KaiOS devices, we offer a set of graphic templates in various size blocks.

Choose suitable blocks for your device and add them to your screen cling artwork.

Notes

For exceptions on specific apps or specific markets, please contact KaiOS Support & Product team to get final approval.

KaiOS reserves the right of final interpretation for the content hereinabove.

Stay up-to-date

Follow us on [Twitter](#), [Facebook](#), and [LinkedIn](#) to discover what's new and next for KaiOS, smart feature phones, and closing the digital divide.

You can also send in your questions, comments, and ideas to marketing@kaiotech.com.
